DETAILED ACTION

1. This action is responsive to papers files on 1/2/2007.

Response to Amendment

2. In response to applicant's amendment received on 1/2/2007, all requested changes to the claims have been entered.

Response to Argument

Applicant's arguments filed on 1/2/2007 have been fully considered.

All of pending claims are amended, and new office action is written based on new ground.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2624

Claim 3 recites the limitation "the check" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayosh (US 6,351,553).

With respect to claim 1, Hayosh teaches, sheet material (Fig. 1, ref. no. 10); means defining at least one pre-printed symbol (MIRC) on the sheet material (Fig. 1, ref. no. 12) and means for storing on the sheet material apriori reference image quality data which is representative of at least one image quality characteristic of the at least one pre-printed symbol on the sheet material to allow a determination to be made about the image quality of the pie-printed symbol on the sheet material based upon the stored apriori reference image quality data (abstract).

Art Unit: 2624

With respect to claim 2, please refer to rejection for claim 1.

With respect to claim 3, please refer to rejection for claim 1.

With respect to claim 10, please refer to rejection for claim 1.

With respect to claim 11, Hayosh teaches, storing on the financial document apriori reference image quality data which is representative of image quality characteristic of at least one symbol (Fig. 1, ref. no. 12, MIRC) printed on the financial document (Fig. 1); receiving image data which is representative of the image of the financial document (Fig. 4, col. 5 lines 15-57); retrieving the stored apriori reference image quality data (Fig. 4, ref. no. 68); comparing the retrieved apriori reference image quality data with the image data which is representative of the image of the financial document to determine the image quality of the symbol printed on the financial document (Fig. 4, ref. no. 72; col. 5 lines 29-36); and providing an indication of quality of the image of the financial document based upon the comparison of the apriori reference image quality data with the image data (Fig. 4, ref. no. 68).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2624
